GeForce RTX 4000 ST series 1-Clip Booster Installation Guide

Thank you for purchasing GeForce RTX 4000 ST series graphics card.
An extra 1-Clip Booster fan can be installed on the back of the PCB, creating a push-pull effect for enhanced cooling performance. To install, please follow below instructions.

1-Clip Booster

Extra clearance is needed at the back of the graphics card to install the 1-Clip booster fan, this feature might not be compatible with all motherboards. Please check our website for fan dimensions and clearance requirement.

Step:1

Locate the ventilation area where the fan will be installed on the back plate. Notice the size and position of the mounting holes are slightly different.

Step:2

Gently slide in the 1-Clip Booster fan. Slide in one side first and then the other, you will hear a small clip sound when the fan is properly installed. Notice the side with the cable should be facing outwards.

Step:3

Plug in the fan cable to the 3-pin connector located at the edge of the heatsink cover, shown in the picture below.

To uninstall, simply reverse the instructions listed above.
